TST-Turbo Service & Trading GmbH offers complete OEM-independent services for turbo machines in cooperation with dedicated partners around the world.

Our national and international customers range from the petrochemical industry and operators of industrial power plants to companies in the energy supply sector.

In accordance with company philosophy TST guarantees their demanding clientele a high standard for quality and safety. We focus on customer proximity and are dedicated to acting swiftly and flexibly according to customer needs.

Our service spectrum includes:

- Modernization and performance adjustment
- Automation
- Delivery of spare parts
- Overhauling and manufacturing of mechanical parts
- Dismantling and reassembly
- Complete overhauls

for steam turbines, gas turbines, and compressors.

Reverse engineering
